

KEY STAGE 4 RESULTS 2025

The Children's Hospital School are incredibly proud of their GCSE results and the hard work, dedication and resilience that our students have shown despite their medical needs and personal daily challenges.

Below is a summary of our GCSE results. For a more detailed report please contact the school who will be able to provide you with a copy of the Exams 2025 Report.

In a small cohort, one student represents a large percentage. The profile of students can change dramatically year on year. Students at Children's Hospital School do not all take the same GCSE subjects and number of qualifications – students are entered for GCSE based on their individual needs with their health being paramount.

GCSE Pass Rate

The percentage of GCSEs that were passed at 4 (standard pass) has improved. Although our results are lower than national average, pass rates at Willow Bank School are improving.

This chart shows the 9 - 4 pass rate in each subject. The pass rate remains consistently high in Film and has much improved in Art and Health and Social Care. Science results have improved again too. Results in English and Maths are lower than option subjects. In part this is because all students take these.

Vocational Results 2025

In addition to GCSEs students were able to access additional qualifications. All these qualifications help to offer a broad curriculum to CHS students. They can be especially useful for ensuring students who, through illness have missed too much to contemplate a GCSE entry, are able to achieve some form of qualification in order to ensure a future pathway.
